

Lineberger Veterinary Hospital offers full service professional pet Grooming Monday thru Friday.

Ashley Clark, our professional groomer, personalizes each grooming experience according to the owner and pet's individual needs. Grooms can range from a Bath, Brush, and Trim to a Full Body Clip. Each groom includes a bath, nail trim, ear cleaning, and anal gland expression.

Every groom is personalized according to the pet's shape, size, and coat condition.

A **Bath, Brush, and Trim** consists of a simple face, feet, and sanitary trim. Ashley trims the skirt, legs, and chest area.

A **Full Body Clip** is a detailed haircut of the entire body. The hair is trimmed to the desire length. Each groom includes a **bath** with our veterinary exclusive hypo-allergenic and soap-free shampoo. During the bath the **anal glands** are expressed. The **nails** are trimmed and ground smooth and round with a dremmel so the quick is not damaged. Ashley then plucks the ear hair to allow better air flow, reducing moisture to help prevent ear infections. She then cleans the **ears** using a water-based sweet pea and vanilla cleansing and drying solution.

For an additional charge Ashley can brush the pet's teeth using an enzymatic toothpaste that helps break down tartar. Dogs and cats both enjoy the chicken flavor.

The Blueberry Facial Scrub is a gentle and tearless product that helps reduce the appearance of tear staining.

An application of Vectra 3D topical solution can be applied for a monthly flea, tick, and mosquito preventative after the groom.
